PROFESSIONAL SUMMARY

Information Systems Engineering student with corporate IT consulting experience in business process automation and software development. Specialized in designing and implementing automation solutions with **Automation Anywhere** and **Power Automate**, backend development with **Node.js** and **REST APIs**, and database modeling/management with **SQL Server**. Solid background in the **Microsoft Azure** ecosystem, **Power BI**, **ITSM platforms (ServiceNow)**, and enterprise infrastructure. Focused on optimizing business operations, eliminating manual workloads, and delivering reliable system integrations under high quality and security standards.

WORK EXPERIENCE

Jr. IT Developer & Consultant (Full-Time)

Mar 2026 – Present

KPMG

Buenos Aires, Argentina

- Design and implementation of Robotic Process Automation (RPA) solutions, collaborating with business stakeholders to capture requirements and define technical specifications.
- Development of bots and virtual agents using **Automation Anywhere** and automated workflows with **Power Automate**, reducing operational turnaround times and manual errors.
- Development of backend components and solutions using **Node.js**, integrating business logic and data processing services.
- Consumption and integration of **REST APIs** for cross-system interoperability and business workflow automation.
- Advanced data querying, analysis, and data manipulation in **SQL Server** to support automated processes and management reporting.
- Creation of interactive dashboards and analytical reports in **Power BI** to track and analyze operational KPIs.
- Development, deployment, and support of enterprise solutions hosted within the **Microsoft Azure** cloud environment.
- Active participation across the full software development lifecycle: requirements analysis, technical design, implementation, testing, and documentation.

IT Support / HelpDesk L1 (Full-Time)

Mar 2025 – Mar 2026

KPMG

Buenos Aires, Argentina

- Operational task automation via scripting and automation tools, optimizing support ticket handling and cutting manual intervention.
- Technical troubleshooting and incident resolution (L1 support with active L2 collaboration), identifying root causes and recurring trends for continuous improvement.
- End-to-end incident and service request lifecycle management via **ServiceNow**, meeting critical SLA commitments.
- Identity, account, role, and license provisioning across **Active Directory (AD)** and **Microsoft 365 (O365)**.
- Deployment, validation, and monitoring of system updates and security patches using **Microsoft Intune**.
- Adoption of AI-assisted productivity tools and automation to streamline processes, technical inquiries, and documentation.
- Authoring of technical documentation and internal knowledge base articles for procedure standardization.

IT Financial Support & Infrastructure

Apr 2024 – Jul 2024

John Deere

Rosario / Buenos Aires, Argentina

- Handled incident and service request lifecycles for core financial applications using **ServiceNow** with detailed technical follow-up.
- Executed and validated scripts in development and production environments, coordinating releases through **SharePoint** approval workflows.
- Implemented authentication and integration workflows using APIs and **Python**, managing enterprise identity access with **OKTA**.
- Identified and remediated cybersecurity vulnerabilities across corporate infrastructure using **Qualys**.
- Performed hardware, software, printer, and peripheral diagnosis and maintenance for workstations across manufacturing plant and corporate offices.

IT Support Technician & PC Repair

2022 – 2024

Freelance

Buenos Aires, Argentina

- Delivered hardware and software troubleshooting, repair, and preventive maintenance for desktop computers and laptops.
- Installed and configured operating systems, base software, automated backup policies, and basic data recovery.
- Configured local area networks (LAN / Wi-Fi) and provided end-to-end client service and technical support.

EDUCATION

Bachelor's Degree in Information Systems Engineering
Universidad Tecnológica Nacional (UTN)

Mar 2025 – Dec 2030 (In progress)
Buenos Aires, Argentina

Coursework in software engineering, systems analysis and design, data structures, algorithms, databases, and information technology. Focused on scalable software architectures, technology management, and best practices for secure application development.

TECHNICAL SKILLS

Automation & RPA: Automation Anywhere, Microsoft Power Automate, VBScript, Python Scripting, Business Process Automation.

Development & APIs: Node.js, JavaScript, Python, REST APIs, JSON, Systems Integration, Git / GitHub.

Databases & Analytics: Microsoft SQL Server (T-SQL, complex queries, data manipulation), Power BI (Data modeling, DAX, interactive dashboards).

Cloud & Microsoft Ecosystem: Microsoft Azure, Active Directory (AD), Microsoft 365, SharePoint & Approval Workflows, Microsoft Intune.

ITSM & Security: ServiceNow, InvGate (Service Management & Asset Management), OKTA, Qualys (vulnerability management), L1/L2 Support, SLA Management, VPN.

Testing & QA: Selenium, Cypress, Playwright, Test Automation Foundations.

Languages: Spanish (Native), English (Intermediate - B1).

Professional Competencies: Analytical and logical thinking, problem solving, technical solution design, technical documentation, cross-functional collaboration, adaptability and continuous learning.
